Vehicle Symbol Assignment Manual
Appendix

Miscellaneous Vehicle Rules - Model Years 2001 and Later

Rating Vehicles Not Specifically Listed (Model Year 2001 and Later):

When a new vehicle is placed on the market, it is possible that there is some lag before POLK and the Highway Loss Data Institute (HLDI) can identify the vehicle. POLK is our vendor for vehicle information and our analysis of vehicles uses HLDI loss information. Our manual will be updated, following these rules, with our next annual filing:

1. If a new model year vehicle is (for crash worthiness purposes) substantially the same as the prior model year as defined by HLDI and is present in the POLK database, assign the prior model year's symbols to the new vehicle.
2. If a new model year vehicle is (for crash worthiness purposes) not substantially the same as the prior model year as defined by HLDI or if the vehicle is a new product in the current model year and is in the Polk database, assign the symbols according to the table below (vehicle categories are defined according to HLDI definitions from the 2004 model year):

Size Category	Class Category	Bodily Injury	Property Damage	Med Pay /PIP	Unins Motorists	Compre-hinsive	Collision
Mini	2 Door	54	39	70	70	46	48

Miscellaneous Vehicle Rules – Model Years 2001 and Later (cont.)

3. If a new model year vehicle is not in the Polk database, assign this vehicle to the Proprietary Rating Symbol 45. The vehicle age factor will apply. For physical damage coverages, follow the cost new methodology in the next section.

Cost New Symbol Chart:

Comprehensive and Collision symbols are assigned according to the following chart:

Compre-hensive Symbol	Collision Symbol	Price New Range
01	23	$0 – 6,500
07	26	$6,501 – 8,000
14	29	$8,001 – 9,000
18	31	$9,001 – 10,000
21	33	$10,001 – 11,250
24	34	$11,251 – 12,500
27	36	$12,501 – 13,750
28	37	$13,751 – 15,000
31	38	$15,001 – 16,250
34	40	$16,251 – 17,500
37	41	$17,501 – 18,750
40	43	$18,751 – 20,000
43	44	$20,001 – 22,000
46	46	$22,001 – 24,000
49	48	$24,001 – 26,000
52	49	$26,001 – 28,000
54	51	$28,001 – 30,000
58	53	$30,001 – 33,000
62	54	$33,001 – 36,000
66	57	$36,001 – 40,000
69	59	$40,001 – 45,000
72	61	$45,001 – 50,000
77	64	$50,001 – 60,000
83	68	$60,001 – 70,000
87	71	$70,001 – 80,000

Vehicles valued over $80,000: for each $10,000 or fraction thereof add 0.50 to the symbol 87 factor for comprehensive and add 0.28 to the symbol 71 factor for collision to the appropriate model year of the vehicle.

For model years 2001 and subsequent, the cost new symbol for the liability coverages is Symbol 45.

Combined Single Limit Liability

When Combined Single Limit Liability is applicable in the state, the corresponding bodily injury symbol is used for premium determination.

Uninsured/Underinsured Motorists Property Damage

When Uninsured Motorists Property Damage and/or Underinsured Motorists Property Damage is applicable in the state, the corresponding collision symbol is used for premium determination.

21st CENTURY CENTENNIAL INSURANCE COMPANY

ARKANSAS PRIVATE PASSENGER AUTOMOBILE

FILING MEMORANDUM

The attached manual pages reflect a proposed rate and rule revision for the state of Arkansas. The overall rate level effect of the proposed changes is 3.5% and is summarized in Section A, Exhibit 1.

We are filing revisions to our territorial base rates for all coverages except Bodily Injury and Property Damage. The proposed changes are being applied uniformly across all territories by coverage. The proposed changes by coverage are summarized in Section A, Exhibit 1. The calculation of the proposed base rates by coverage and territory are developed in Section A, Exhibits 2 – 5. Revised rate page AR-R-1 is attached.

Tier Score Ranges are being revised to improve our competitive position in the state of Arkansas. Revised manual page AR-M-4 is included to reflect this change. As this revision affects New Business only, there is no rate level effect.

Also included are revised proprietary company symbol assignment manual pages. These pages have been updated for the inclusion of newer model vehicles. There is no rate level effect.

These revisions are proposed to be effective for all policies written on or after June 27, 2011. In conjunction with our 37 day renewal cycle, this will affect all Renewal policies with an effective date on or after August 3, 2011.

21st Century Centennial Insurance Company

Arkansas
Explanatory Memorandum Pertaining to Section B

Experience Period

This program was introduced in 21st Century Centennial Insurance Company in Arkansas effective April 27, 2009. The statewide rate level indications are based on our private passenger automobile experience in the state of Arkansas for accident years ending September 30, 2009 and September 30, 2010 evaluated as of December 31, 2010.

Premiums

The earned premiums for all coverages reviewed are the premiums that would have resulted if the present rates had been charged during the experience period. Therefore, they reflect fully any rate changes that have occurred since or during the experience period. In addition, a premium trend factor is calculated and used in deriving earned premium at present rates.

Losses

Incurred losses are adjusted to include all loss adjustment expenses and have been reduced for salvage and subrogation recoveries. The loss adjustment expense factors used in this review are based on two years of countrywide experience as shown in this section.

The incurred loss and loss adjustment expenses have been developed to an ultimate settlement basis by applying loss development factors based on countrywide experience. The incurred counts/paid average method was utilized to develop losses to ultimate. Projected claim counts were multiplied by projected claim severities and the resulting ultimate losses were divided by the respective calendar/accident year incurred losses to develop a loss development factor. Comprehensive losses have also been adjusted for catastrophes.

Prospective Annual Change in Losses – Trend

1. Liability

The prospective annual changes in losses are calculated by coverage. The average annual changes in losses are based upon the latest available average paid claim cost and paid claim frequency data for ISO and Fast Track. The claim cost data is used as a measure of the inflationary trend in the cost of claims. The claim frequency data is used as a measure of the trend in claim occurrence. The method of trend determination utilized in this revision makes use of the Least Squares Method fitted to the reported time series data; specifically an exponential curve represented by the equation $Y = Ae^{(Bx)}$ is fitted to the claim cost and claim frequency data. The parameters A and B are calculated constraints; x is the unit of time, e is the exponential function with the natural logarithm base of e, which has a numerical value of 2.7182812…; and Y is the fitted value on the curve. The claim cost and claim frequency curves are determined from the latest 4, 6, 8 and 12 quarterly year ended experience periods. Credibility is based on the number of claims underlying the latest year's experience appearing in the trend exhibits.

The average historic and prospective annual change in claim costs and average historic and prospective annual change in claim frequency were then selected from the ISO and Fast Track data. The average historic and prospective annual change in losses was then obtained by combining the average annual change in claim costs with the average annual change in claim frequency. For Medical Payments, the average annual change in losses was calculated using the Medical Care Component of the Consumer Price Index. Furthermore, the selected trend factor utilized for the Uninsured Motorists coverage is equal to the Bodily Injury coverages.

2. Physical Damage

For physical damage coverages, the average historic and prospective annual changes in losses are based upon the latest available paid claim cost and paid frequency data for Fast Track and ISO (ISO data was used for Comprehensive trend selections). Upon examining the exponential fits of the above mentioned information, a rate of change was selected which is judged to be an appropriate indicator of loss cost trend.

Trend Period

The number of years used for the historic trend projection is the number of years from the midpoint of the accident year to the end of the experience period. The number of years used for the prospective trend projection is the number of years from the end of the experience period to the average date of coverage under the proposed rates. The average date of accident for fiscal accident year ending September 30, 200X would be March 31, 200X.

The losses in this filing are projected to nine months beyond the anticipated renewal effective date. This date represents the average date of accidents occurring under the proposed rates, assuming our rates will be in effect for one year. This average accident date takes into account the issuance of semiannual policies.

Permissible Loss and Loss Adjustment Expense Ratio

The permissible loss and loss adjustment expense ratio used in the filing is the complement of the provision in the rates for expenses and for a profit and contingency provision, after consideration of investment income.

Line 17 Line 15 / Line 16

Line 18 Federal Taxes on Investment Income
American International Insurance Company Annual Statement as of 12/31/09
Exhibit of Net Investment Income

	Income	Tax Rate	
Bonds			
Taxable (Line 1.2)	1,231,377	0.350	
Non-Taxable (Line 1.0 + 1.1)	37,128,340	0.053	(A)
Stocks			
Unaffiliated (Line 2.1 + 2.2)	0	0.112	(B)
Affiliated (Line 2.11 + 2.21)	0	0.053	(A)
Other Investment Income	1,047,195	0.350	
Subtotal (Line 10)	39,406,912	0.070	
Investment Deductions (Line 13)	0	0.350	
Net Investment Income	39,406,912	0.070	

Line 18 = Line 17 * (1 - Net Investment Income Tax Rate)

(A) 15% of the income is taxed at a full corporate income tax rate of 35%. The applicable tax rate is thus 5.3% (0.15 x 0.35 = .053).

(B) Only 20% of dividend income is subject to a full corporate income tax rate of 35%. 15% of the remaining 80% of dividend income is taxed at a rate of 35%. The applicable tax rate is thus 11.2% [(0.20 x 0.35) + (0.80 x 0.15 x 0.35) = 0.112].
