ARKANSAS INSURANCE DEPARTMENT

FORM A-1
Rev. 4/98

PRIVATE PASSENGER AUTOMOBILE ABSTRACT

Instructions: All questions must be answered. If the answer is "none" or "Not applicable", so state. If all questions are not answered, the filing will not be accepted for review by the Department. Use a separate abstract for each company if filing for a group. Subsequent homeowners rate/rule submission that do not alter the information contained herein need not include this form.

Company Name LM Insurance Corporation (LM-IC); LM General Insurance Company (LMGIC)
NAIC No. 0111-33600; 0111-36447 Group No. _____

1. Are there any areas in the State of Arkansas in which your company will not write automobile insurance?
No

2. Do you furnish a market for young drivers? Yes
Over age 65 drivers? Yes

3. Do you require collateral business to support a youthful driver risk? Yes

4. Do you insure driver with an international or foreign driver's license? Yes

5. Specify the percentage you allow in credit or discounts for the following:

a.	Driver Over 55	5 %
b.	Good Student Discount	0.625-22.5 %
c.	Multi-car Discount	5.447-9.091 %
d.	Accident Free Discount*	Dependent %

*Please Specify Qualification for Discount:

- Each of the policy's experience operators has five Clean Years. Clean Years are consecutive, most recent years in which no incidents occurred.
  - For this rule, incidents include non-administrative violations as well as accidents with Property Damage or Collision claim over $750, or a Bodily Injury claim greater than $0.
- At least one operator on the policy has been licensed for at least five years
- No accident has been forgiven by Liberty Mutual during the last five years

e.	Anti-theft Discount	8.7-25 %
f.	Other (specify)	%
	Newly independent	2.085-10%
	Military	1-4 %
	Teen Smart	1.25-20 %

6. Do you have an installment payment plan for automobile insurance? Yes
If so, what is the fee for installment payments?
It is free for EFT or payroll deduction; the fee per payment by direct billing is $4 per payment

7. Does you company utilize a tiered rating plan? Yes If so, list the programs and percentage difference.
Market Segment Continuum; LM-IC &LMGIC tier - All new business is written in tier

State the current volume for each program.

LM-IC	223
LMGIC	2509

Summary of Rate Indications

Narrative

The most current rate level indication for Arkansas Automobile is +12.9% with a new business effective date of April 30, 2014 and a renewal business effective date of June 4, 2014.

Past and Prospective Experience Within and Outside the State

Calendar year earned premiums and accident year losses (incurred losses for Liability and paid losses for Physical Damage) are utilized in the indication. Three years of experience are used for both Liability and Physical Damage coverages beginning July 1, 2010 and ending June 30, 2013. Losses are evaluated as of June 30, 2013. The credibility weighted indications are +17.8% for Liability (See Exhibit I, Sheet 1) and +7.8% for Physical Damage (See Exhibit I, Sheet 2). The overall indication is +12.9%.

Liability and Physical Damage premiums are brought to current level by means of the parallelogram method (See Exhibit VIII). Liability premium is adjusted to reflect a reduction in the average on-leveled earned premium. Physical Damage premium is also adjusted to reflect the effects of Symbol Trend, Model Year and Deductible shift.

Exhibit IV shows the development of losses by accident year. Countrywide loss development factors were utilized for UM because loss development patterns based on Arkansas data show too much variability over the historical period. For all other coverages, Arkansas loss data was used to select loss development factors.

For each coverage, two annual trend factors are selected. The historical trend factor trends losses from the midpoint of each year used in the experience period to the midpoint of the latest experience period. In this case, the midpoint of the latest experience period is January 1, 2013. The loss projection factor trends losses from the midpoint of the latest experience period to one year beyond the proposed effective date (i.e. average accident date of the proposed policy effective period). In this case, losses are trended to March 4, 2015 for 6 month policies & June 4, 2015 for 12 month policies. The loss trend selections are based on Liberty Fast Track data and are shown in Exhibit V.

Fixed expense ratios of 26.5% and 25.2%, as a percent of Earned Premium, were calculated for Liability and Physical Damage, respectively (See Exhibit VII) and then added to the developed and trended loss ratio to determine the overall indicated loss, fixed expense and loss adjustment expense ratio.

Catastrophic Hazards

A catastrophe load factor of 1.180 is selected based on the long-term catastrophe experience in Arkansas (See Exhibit VI). Catastrophe losses are removed from the Comprehensive loss experience and the data is then adjusted by including the selected catastrophe load.

Insurer Operating Expenses

Both Liability and Physical Damage incurred losses are adjusted to include all loss adjustment expenses. Based on Liberty Mutual Arkansas projections we have selected the LAE factors of 1.209 for non-MedPay Liability, 1.151 for MedPay and 1.166 for Physical Damage.

The projected permissible loss, fixed expense and loss adjustment expense ratio for Liability is +82.5%. The projected permissible loss, fixed expense, and loss adjustment expense ratio for Physical Damage is +78.8% (see Exhibit VII).

Appendix A

Liberty Mutual Insurance

Private Passenger Automobile

Countrywide Profit Provision

As Liberty Mutual Insurance is organized under a mutual holding company system, our company has limited recourse to stock market capitalization to generate needed surplus funds, unlike a publicly-traded insurance company or an insurance company with a publicly-traded parent. Any increase in surplus must come from (1) underwriting profit, (2) investment income, (3) realized capital gains, or (4) unrealized capital gains. In the following analysis, Liberty Mutual selects provisions for underwriting profit which will ensure that anticipated income from all sources produces net income after taxes that is commensurate with the risk assumed in the business of property/casualty insurance. Furthermore, these provisions ensure that projected changes in policyholder surplus are sufficiently similar (in direction and magnitude) to changes in premium accounts so that confidence in the Companies' financial integrity can be maintained.

Exhibit A shows a history of calendar year rates of return for investment income expressed as a percentage of mean invested assets. The primary source is interest, dividends, and real estate income shown in column (3). Based on the current market yield, it is reasonable to anticipate before tax returns of 3.7% from interest, dividends, and real estate income during the time rates are effective. Historically, realized capital gains have contributed very little to earnings. For the prospective period, we select 0.2% from this source. In total, our anticipated pre-tax return is 3.9%. We believe this a reasonable return given the current interest rate environment. After federal income taxes, the total anticipated rate of return is 2.8% of invested assets.

Exhibit B presents the investment income derived from unearned premium reserves. The model uses historical information, modified for the current tax rate. This income is separated into two categories. First, there are premium finance charges [Line 10] collected by allowing policyholders to pay their premiums in installments over the 12-month policy term. Line 3 is the corresponding portion of the unearned premium reserve representing the premium which is being financed by the company. Second, there is the remaining reserve, after prepaid expense and taxes, [Line 7] which develops income based on the anticipated rate of return.

Exhibit C applies the rate of return to mean loss and loss adjustment expense reserves. These exhibits relate investment income to premium earned. Exhibit D provides pertinent expense data to calculate the Permissible Loss Ratio. Exhibit E deals with the calculation of federal income taxes applicable to unearned premium and loss reserves.

Income from all of the above sources is combined with our selected underwriting profit provisions in the following 2 to 1 premium-to-surplus model:

Let Premium = $100; Surplus = $50

Memo Exhibit

		Liability	Physical Damage
1)	Investment Income on Unearned Premium Reserves $100 x (Exhibit B, Table 1, Item 12)	($0.03)	($0.03)
2)	Investment Income on Loss Reserves $100 x (Exhibit C, Table 1, Item 5)	$2.20	$0.06
3)	Investment Income on Surplus $50 x (Exhibit A, Table 1, Column 7)	$1.40	$1.40
4)	Underwriting Income After Tax $100 x (1-.35) x Profit Provision (Exhibit D, Item 4)	$5.79	$7.93
5)	Total Expected Return [1]+[2]+[3]+[4]	$9.36	$9.36
	Average Total Expected Return (Based on earned 60.1%/39.9% premium distribution)	$9.36	
6)	Expected Return on Surplus ([5] x Premium:Surplus Ratio)/$100	18.7%	
7)	GAAP Adjusted Return [6]/GAAP Adj. Factor (Exhibit F, Item 6)	15.0%	

We have determined that, related to surplus, 15.0% is an appropriate and fair rate of return for property-casualty insurers in comparison with other industries, given the variability in the overall return. The pre-tax profit provisions of 8.9% for liability and 12.2% for physical damage are derived using an iterative method to yield an anticipated return of 9.36% on earned premium after tax, and a 15.0% GAAP adjusted return on surplus. However, we have selected lower target profit provisions of 8.0% for liability and 11.9% for physical damage as a percentage of premium.

RE: Personal Automobile Policy Program
LM Insurance Corporation NAIC # 111-33600
LM General Insurance Company NAIC # 111-36447

Dear Commissioner Bradford:

In accordance with the "File & Use" filing provision, the LM Insurance Corporation (LM-IC) and the LM General Insurance Company (LMGIC) respectfully request to file a rate revision to our Personal Automobile Program for new business effective on **May 9, 2014**, and renewal business on **June 13, 2014.**

Base rate and Base tier will be applied with general uniformity across different territories. The overall rate effect is 3.2% on new business and 3.7% on renewal business.

Included in the Tier changes are:

- Adjustments to Years Since Most Recent Accident and Years Since Most Recent Violation that allow us to more accurately price different customer groups based on their driving history
- Adjustment to Minimum Driver Age that will also allow us to reduce pricing to customers with higher quality characteristics, such as drivers with more experience behind the wheel

Please note the tier revision will not affect any existing policyholders.

Summary of Changes

Rate Changes

1. Base Rate changes will result in a premium impact of 3.7% on all coverages combined for renewal business.
2. Base Tier changes will result in a premium impact of 3.2% on all coverages combined for new business.
