## JOHN HANCOCK LIFE INSURANCE COMPANY (U.S.A.)

### SEPARATE ACCOUNT B RIDER

The Sub-accounts available under this Separate Account are described below. The Company reserves the right to substitute shares of another mutual fund, trust or portfolio thereof with similar investment objectives for each Sub-account.

Sub-accounts will be selected or changed upon direction from the Contractholder.

Contributions to the Sub-accounts are recorded in Units.

#### UNIT VALUE

The Value of a Unit in the Sub-account on a Valuation Date is computed by dividing the proportion of the entire Sub-account's Market Value attributable to all Units of that kind, after deduction of any applicable charges, by the number of Units of that kind outstanding at the end of that Valuation Date. This Unit Value will remain unchanged until the next Valuation Date.

#### CONVERSION OF CONTRIBUTIONS

Contributions to an account under a Sub-account will be credited in accordance with the Contributions and Accounts section of the Contract. Such contributions will be converted into Units of the Sub-account. The number of Units credited to an account with respect to each contribution will be equal to C/U where:

“C” is the contribution received, and

“U” is the Unit Value on the Day the contribution is being converted.

#### VALUE OF AN ACCOUNT

The Value of an account on a Valuation Date will be equal to the number of Units of the appropriate Sub-account multiplied by the Unit Value determined for that kind of Unit on that Date.

The value of an account on a Date other than a Valuation Date will be equal to the sum of:

- a) the number of Units in the account multiplied by the Unit Value of that Sub-account on the most recent Valuation Date; and
- b) the amount of contributions credited to the account which have not yet been converted into Units.

#### WITHDRAWALS

Withdrawals from a Sub-account will only be allowed on a Valuation Date. On the applicable Valuation Date, the Company will convert the Units in the account into cash using the Unit Value in effect on that Valuation Date.

A request for withdrawal will be processed in accordance with the Withdrawals section of this Contract.

#### INTER-ACCOUNT TRANSFERS

Inter-account transfers will be treated in the same manner as withdrawals. Additionally, transfers will be processed in accordance with the Inter-Account Transfers section of this Contract.

#### EXPENSE RATIO

There is an expense ratio for each kind of Unit of the Sub-account. The expense ratio is composed of the Company's administrative maintenance charge plus the charges and fees of any underlying mutual fund (“the underlying fund expense”). The Company's administrative maintenance charge will be reduced if the Company or an affiliate receives asset based distribution charges (“12b-1 fees”) or sub-transfer agency fees from the underlying mutual fund or its underwriter. The expense ratio is applied against the proportion of the Market Value of the Sub-account attributable to that kind of Unit.

The expense ratio for the kind of Unit issued with respect to this Contract will be no more than the maximum administrative maintenance charge for each Sub-account outlined in this Separate Account Rider plus the underlying fund expense. This will be equivalent to a daily charge based on a percentage of the Market Value of the Sub-account attributable to that kind of Unit as outlined in this Separate Account Rider. The daily charge will be applied on each Valuation Date to the Market Value determined on that Date to be attributable to the kind of Unit issued with respect to this Contract and on each Market Day which is not a Valuation Date to the Market Value determined on the preceding Valuation Date to be attributable to the kind of Unit issued with respect to this Contract. The daily Unit Value declared reflects the application of the daily equivalent of the expense ratio.

We may change the actual administrative maintenance charge at any time provided it does not exceed the specified maximum and we give you three months advance written notice of the intended change.

**[EXPLORER FUND**

Contributions to the Explorer Fund will be invested solely in the shares of the Vanguard Explorer Fund (Class Investor), a portfolio managed by Vanguard Group, Inc.

- The Vanguard Explorer Fund seeks to provide long-term capital growth. The Fund invests mainly in the stocks of small companies (which, at the time of purchase, typically have Market Values between \$500 million and \$2.5 billion). These companies tend to be unseasoned but are considered by the Fund's advisers to have superior growth potential. Also, these companies often provide little or no dividend income. Historically, these stocks have been more volatile in price than the large-cap stocks that dominate the overall stock market, and they often perform quite differently. Vanguard Explorer Fund employs five investment advisers, each of which independently chooses and maintains a portfolio of common stocks for the Fund. The Fund's board of trustees decides the proportion of Fund assets to be managed by each adviser and may change these proportions at any time. Although the Fund typically does not make significant investments in foreign securities, it reserves the right to invest up to 20% of its assets this way. The Fund may also invest in stock futures and options contracts, which are types of derivatives. Losses (or gains) involving futures can sometimes be substantial—in part because a relatively small price movement in a futures contract may result in an immediate and substantial loss (or gain) for a fund. The Fund will not use derivatives for speculative purposes or as leveraged investments that magnify gains or losses. The Fund's obligation under futures contracts will not exceed 20% of its total assets.

**[ROYCE OPPORTUNITY FUND**

Contributions to Royce Opportunity Fund will be invested solely in the shares of the Royce Opportunity Fund (Class Service), a portfolio managed by Royce & Associates, LLC.

- The Royce Opportunity Fund's goal is long-term growth of capital. Royce invests the Fund's assets primarily in a diversified portfolio of equity securities issued by small and micro-cap companies in an attempt to take advantage of what it believes are opportunistic situations for undervalued securities. Although the Fund normally focuses on the securities of companies with market capitalization's less than \$2 billion, it may, in certain market environments, invest an equal or greater percentage of its assets in securities of larger-cap companies. Normally, the Fund will invest at least 65% of its net assets in equity securities. Therefore, the Fund may involve considerably more risk of loss and its returns may differ significantly from funds investing in larger-cap companies or other asset classes.

In addition to the Underlying Funds, the Fund may invest in additional PIMCO Funds created in the future at the discretion of PIMCO and without shareholder approval.
