Except for the enhancements and clarifications detailed below, there are no differences in applicable premium, eligibility rules, or coverages between the approved Empire Fire and Marine Insurance Company program and the new Praetorian program. Changes to the manual are limited to cosmetic changes only unless noted below.

1. Revised the Base Rates for this program to be 9.5% above that of Empire Fire and Marine.
2. Addition of a Multi-Policy Credit.
3. Addition of a Mature Citizens Discount.
4. Addition of an Eligibility Factor.
5. Addition of the Catastrophe Protection: Additional Limits of Liability endorsement which will be included on all HO 00 03 policies at no additional cost.

7. Addition of High Deductible Options of \$5,000, \$7,500, and \$10,000.

Objection Letter Date 08/26/2009
Submitted Date 08/26/2009
Respond By Date

Dear Virginia Putzu,

This will acknowledge receipt of the response dated 8/26/2009.

Objection 1

No Objections

Comment: The explanation for placement into the preferred tier versus the standard tier is not sufficient. What specifically would cause the risk to not qualify for the preferred tier?

Objection 2

No Objections

Comment: Insufficient statistical justification was provided to determine whether the multi-policy credit, preferred builder credit, and affinity credit complies with ACA 23-67-208(d) regarding a reasonable relationship to expected loss and expense experience. Please delete these discounts/credits.

Please feel free to contact me if you have questions.

In accordance with Regulation 23, Section 7.A., this filing may not be implemented until 20 days after the requested amendment(s) and/or information is received.

Sincerely,

Becky Harrington

Dear Becky Harrington,

Comments:

Thank you for your letter of August 26, 2009 on the above captioned filing. We offer the following response to your concerns:

SERFF Tracking Number: QBEC-126267070 State: Arkansas
Filing Company: Praetorian Insurance Company State Tracking Number: EFT \$100
Company Tracking Number: 09-026-004-HO-AR-R

Product Name: Homeowners
Project Name/Number: /

Response 1

Comments: We have provided a few scenarios that would display the circumstances that would cause a risk to qualify for the preferred tier versus the standard tier. As previously stated, we will attempt to place the home in the Preferred tier initially unless there are circumstances which would cause the home not to qualify for the Preferred tier. We have added a statement to the manual under tiering eligibility guidelines for better clarification on page HO-STD-E-10. Please see scenarios below:

Scenario 1:

Age of Home: 24 years
Number of Claims: 0
Protection Class: 6
Number of Units: 1
Wood Burning Stove: No
Result: Preferred Tier
Reason: Best rate in Preferred

Scenario 2:

Age of Home: 24 years
Number of Claims: 1
Protection Class: 6
Number of Units: 1
Wood Burning Stove: No
Result: Standard Tier
Reason: Prior Claim disqualifies for Preferred

Scenario 3:

Age of Home: 24 years
Number of Claims: 0
Protection Class: 8
Number of Units: 1
Wood Burning Stove: No
Result: Standard Tier
Reason: Protection class of 8 disqualifies for Preferred.

Comments: The following is a list of partnered companies:

AIG Encompass Hartford Progressive
 Allied Fidelity National Infinity Safeco
 Balboa GEICO Merastar Travelers
 Chubb Great American Met P/C

For the purposes of the Multi-Policy credit, the partnered company has entered into an arrangement with the agency in order to administer and manage a comprehensive selection of personal lines products. The purpose of the credit is to aid in the sale of new business and to improve the retention of existing policy holders. A new or existing customer who purchases an auto and home policy through the same agency will have a single point of agency contact and in those instances, similarly improved sales opportunities and retention. At this time, the stated companies are the appointed companies that the agency is partnered with to write their business. In the future, if the agency enters into a partnership with any other companies to write their business, we will add them to our list of partnered companies.

We select larger builders and/or publicly traded builders for this offer because we feel that these types of builders generally have better quality control and construction standards. The builders must build at least 300 homes per year in a state or 1,000 homes in a region per year. In addition, the builders must have a direct business relationship with the agency (who will manage the Praetorian) or their subagents.

Mobile Home - A type of manufactured home. They are subject to HUD regulations and will have a HUD stamp on the body of the home. They can be easily identified by their construction having a metal framework chassis, hurricane straps, utility meters are usually attached to pole not the home, and some type of skirting surrounds the base (brick, aluminum, wood, etc.) Like a personal automobile they are titled and have a lien instead of a mortgage. Mobile homes, including those on a permanent foundation, are not eligible.

Occupancy Types

Seasonal and Secondary

A **seasonal home** is a second home typically used by the policyholder as a vacation home on a yearly basis. They are customarily occupied for a certain period of time each year and then vacant for the remainder of the year (i.e., - Seasonal use.) A common characteristic of these properties is that the home is not located in close proximity to insured's primary residence.

A **secondary home** is one that the policyholder will visit frequently throughout the year. An example would be a cabin in the mountains or a lake house that the policyholder goes to on the weekends throughout the year. Although this home is vacant in between these visits, the occupancy of the secondary home is throughout the year, and not just for a specific time period (or season) of each year.

Row house / Town house / Duplex, etc

Replacement Cost

Replacement Cost as defined by the policy is "...the cost to repair or replace, after application of any deductible and without deduction for depreciation with material of like kind and quality and for like use..."

The replacement cost of a dwelling to be insured can be determined:

- Through the use of an acceptable square foot residential valuation system, such as those provided by Marshall/Swift & Boeckh, and must include the cost of the contractor's overhead and profit.
- Through submission of a detailed analysis by a licensed builder/contractor that has been obtained within the past 12 months.

Replacement cost is not the mortgage amount. Policies written in this program must carry a dwelling limit (Coverage A) equal to at least 100% of the estimated total replacement cost of the house. All requests for coverage above 150% of the estimate replacement value will be submitted and approved by underwriting prior to binding or issuance of the coverage.

These are like normal stick-built homes only they are comprised of sections that are built elsewhere and later connected together on-site to complete the home. They can look like a double-wide style mobile home. Modular homes will have a mortgage and follow the general rules of a normal stick-built home.

Mobile Home - A type of manufactured home. They are subject to HUD regulations and will have a HUD stamp on the body of the home. They can be easily identified by their construction having a metal framework chassis, hurricane straps, utility meters are usually attached to pole not the home, and some type of skirting surrounds the base (brick, aluminum, wood, etc.) Like a personal automobile they are titled and have a lien instead of a mortgage. Mobile homes, including those on a permanent foundation, are not eligible.

Occupancy Types

Seasonal and Secondary

A **seasonal home** is a second home typically used by the policyholder as a vacation home on a yearly basis. They are customarily occupied for a certain period of time each year and then vacant for the remainder of the year (i.e., - Seasonal use.) A common characteristic of these properties is that the home is not located in close proximity to insured's primary residence.

A **secondary home** is one that the policyholder will visit frequently throughout the year. An example would be a cabin in the mountains or a lake house that the policyholder goes to on the weekends throughout the year. Although this home is vacant in between these visits, the occupancy of the secondary home is throughout the year, and not just for a specific time period (or season) of each year.

Row house / Town house / Duplex, etc

A dwelling with more than one residence sharing a common wall.

Dwelling under construction/major renovation

Home being built for first time, or dwelling with a new addition or floor being added.

Dwelling under minor renovation

Dwelling where residing, re-roofing, exterior painting or interior appearance improvements such as new carpet, wall paper, or painting, are occurring.

Replacement Cost

Replacement Cost as defined by the policy is "...the cost to repair or replace, after application of any deductible and without deduction for depreciation with material of like kind and quality and for like use..."

The replacement cost of a dwelling to be insured can be determined:

- Through the use of an acceptable square foot residential valuation system, such as those provided by Marshall/Swift & Boeckh, and must include the cost of the contractor's overhead and profit.
- Through submission of a detailed analysis by a licensed builder/contractor that has been obtained within the past 12 months.

Replacement cost is not the mortgage amount. Policies written in this program must carry a dwelling limit (Coverage A) equal to at least 100% of the estimated total replacement cost of the house. All requests for coverage above 150% of the estimate replacement value will be submitted and approved by underwriting prior to binding or issuance of the coverage.

A. Introduction

Coverage is included in the policy form, at no additional charge, for watercraft powered by an outboard engine or motor or combination of outboard engines or motors of up to 25 horsepower, and sailboats less than 26 feet in overall length with or without auxiliary power. Coverage is also included for watercraft powered by inboard or inboard-outdrive engines or motors, including those that power a water jet pump, of 50 horse power or less when not owned by an insured or more than 50 horse power when not owned by or rented to an insured.

B. Coverage Description

Accumulate total horsepower if two or more engines or motors are regularly used together with any single watercraft owned by insured.
 - b. Sailboats 26 feet or more in overall length, with or without auxiliary power.

Seasonal and Secondary

A **seasonal home** is a second home typically used by the policyholder as a vacation home on a yearly basis. They are customarily occupied for a certain period of time each year and then vacant for the remainder of the year (i.e., - Seasonal use.) A common characteristic of these properties is that the home is not located in close proximity to insured's primary residence.

A **secondary home** is one that the policyholder will visit frequently throughout the year. An example would be a cabin in the mountains or a lake house that the policyholder goes to on the weekends throughout the year. Although this home is vacant in between these visits, the occupancy of the secondary home is throughout the year, and not just for a specific time period (or season) of each year.

Home being built for first time, or dwelling with a new addition or floor being added.

Dwelling under minor renovation

Dwelling where residing, re-roofing, exterior painting or interior appearance improvements such as new carpet, wall paper, or painting, are occurring.

Replacement Cost

Replacement Cost as defined by the policy is "...the cost to repair or replace, after application of any deductible and without deduction for depreciation with material of like kind and quality and for like use..."

The replacement cost of a dwelling to be insured can be determined:

- Through the use of an acceptable square foot residential valuation system, such as those provided by Marshall/Swift & Boeckh, and must include the cost of the contractor's overhead and profit.
- Through submission of a detailed analysis by a licensed builder/contractor that has been obtained within the past 12 months.

Replacement cost is not the mortgage amount. Policies written in this program must carry a dwelling limit (Coverage A) equal to at least 100% of the estimated total replacement cost of the house. All requests for coverage above 150% of the estimate replacement value will be submitted and approved by underwriting prior to binding or issuance of the coverage.

Coverage is also included for watercraft powered by inboard or inboard-outdrive engines or motors, including those that power a water jet pump, of 50 horse power or less when not owned by an insured or more than 50 horse power when not owned by or rented to an insured.

B. Coverage Description

1. The policy may be endorsed to provide coverage for the following types of craft:
 - a. Watercraft, up to 26 feet in length powered by outboard engines or motors exceeding 25 horsepower; or powered by inboard or inboard-outdrive engines or motors, including those that power a water jet pump.
Accumulate total horsepower if two or more engines or motors are regularly used together with any single watercraft owned by insured.
 - b. Sailboats 26 feet or more in overall length, with or without auxiliary power.
2. Coverage must be written to expiration of the policy. It is permissible, however, to stipulate for all watercraft eligible in this rule, the navigational period of each year. Premium shall be adjusted on a pro rata basis.
3. For watercraft not described in preceding Paragraphs **A.** and **B.1.**, coverage isn't permitted under the Homeowners Policy.
4. The premium in the state where the Insured's residence premises is located shall apply. However, if the insured owns another residence premises in a different state and principally operates the boat from that residence, apply the premium for that state.
