### Filing Description:

American Reliable Insurance Company is proposing rule and rate revisions to its currently approved Arkansas Manufactured Home Programs. The overall rate impact is +29.7%. Our requested effective date is December 1, 2012 for new and renewal business.

Throughout this filing, where applicable, we have changed the formatting and order for internal conformity. In addition to these changes, the following revisions have been made to the current filing:

#### 1. MH.MP.1

Some rules were changed to better clarify the intent of the program.

- 9. PREMIUM CALCULATION: We have updated the premium calculation rule.
- 14. POLICY FEE: The policy fee has been modified.

#### MH.MP.2

11. PROTECTION CLASSIFICATION CODES: We have added this rule to clarify the codes for protection class.

#### 12. DEFINITIONS:

- Primary Home: Removed "Permanent" from "Primary/Permanent"
  - Insured Age: Clarified this is based on the effective date of the policy term
  - Supplement Heating: Changed the definition to "Any home equipped with a supplemental heating device"

## Rate/Rule Schedule

**MANUFACTURED HOME PROGRAM RULES**

**1. ELIGIBLE RISKS:**

Manufactured homes used for family habitation and light commercial use are eligible. Vacants/Unoccupied homes are not eligible.

**2. POLICY TERM:**

A policy may be written for a term of twelve (12) months.

**3. WHOLE DOLLAR PREMIUM ROUNDING:**

All policy and endorsement premiums will be a full dollar amount. For this purpose, an amount of fifty (50) cents or more will be rounded to the next whole dollar.

**4. MINIMUM PREMIUMS:**

A minimum written premium will apply to all new and renewal policies on a per unit basis. The minimum premium is \$100. A minimum earned premium will apply to all new and renewal policies. The minimum premium is \$100.

**5. INSTALLMENT BILLING OPTIONS:**

Any policyholder may be given the opportunity to pay by installments. All installments will include a \$6 fully earned service charge (not applicable to the down payment). Any policy may be paid in full.

**6. CHANGES:**

All changes requiring adjustment of premium will be computed pro rata, subject to the minimum earned premium.

**7. WAIVER OF PREMIUM:**

When a policy is endorsed after the inception date, additional or return premium up to \$5 may be waived unless the named insured requests the unearned premium be refunded.

**8. CANCELLATIONS:**

If the insurance is canceled at the request of the Company or the insured, the unearned premium will be computed on a pro-rata basis.

**9. PREMIUM CALCULATION:**

BASE PREMIUM is defined as the premium for Coverage A (Manufactured Home), Coverage B (Other Structures), Coverage C (Personal Property), Coverage D (Additional Living Expense), Coverage E (Personal, Premises or OL&T Liability) and Coverage F (Medical Payments to Others) PLUS any increases in Coverages B,C,D,E & F as set forth in the MH.RP rate pages.

BASE PREMIUM is formulated by multiplying A, B, C, D, E & F by the Home Age factor with;  
the result multiplied by Protection Class factor with;  
the result multiplied by Park factor with;  
the result multiplied by Age of Insured factor.  
the result multiplied by Insurance Score factor.

The Discounts that are percentage based (Example: -20%) will be totaled and the Surcharges that are percentage based (Example: +15%) will be totaled. After both criteria are totaled, the difference between the totals (Example: - 20%, +15% = -5%) will be applied. The percentage Discounts and Surcharges will be calculated before the dollar (Example: \$15) Discounts and Surcharges. (This includes any Deductible Options that the insured may select.) The Discounts and Surcharges will apply to the BASE PREMIUM.

**Actuarial Memorandum**

We are proposing a rate level change of 29.7%. The indicated rate level change is 34%. Please see Exhibit 1 for the rate indication. See the filing memorandum for the specifics of rate changes.

The indicated rate level change is determined using standard actuarial principles, based on 5 years of calendar year premiums and accident year losses. We have brought the premium to current level by using the parallelogram method using prior rate changes. The premium has been trended to account for exposure level changes. Please see Exhibit 2

The losses have been developed to ultimate value with a Loss Development Factor, and have been trended to the average accident date for the effective policy year. Please see Exhibits 3 and 4. In addition, the losses have been offset for salvage and subrogation, are net of catastrophes, and have been capped at \$50,000. A cat factor and an excess loss factor is then included. Please see Exhibits 5 and 6.

Credibility is determined using the square root of  $P/K$  limited to 1.0, where  $P$  is 5 years of reported claims, and  $K$  is the credibility standard using a full credibility standard of 3000 claims. The credibility complement is the permissible loss ratio trended since date of last rate change.

The Attract Homeowner score uses information in credit reports to produce a score that indicates the relative rank ordering of applicants and policyholders by claim frequency and/or loss ratio. Attract was developed by LexisNexis using statistical regression modeling techniques. This method finds the most predictive combination of credit characteristics. The characteristics are weighted based on their significance in predicting loss ratio propensity. The weights assigned are tallied resulting in a final score. Scores delivered on an individual range from 200 to 997 with higher scores indicating better risks. In addition to the score, up to four score reasons are delivered that represent the most significant factors that adversely contributed to the score.

The Attract models do not consider race, gender, ethnicity, age, religion, income, marital status or residency.

### Credit Characteristic Groups

The credit characteristics evaluated cover three main areas of the credit report:

**Adverse Public Records:** These include Bankruptcy, Lien, Garnishment and Judgment. Also included in this group are items reported by Collection Agencies. Collection items identified as medical related are excluded.

**Account Information:** This group includes the number of accounts (often referred to as trades), payment history, financial information such as amount of leverage, and how long accounts have been established. Characteristics that are specific to certain industry types such as bank revolving accounts, bank installment, department store, auto finance, personal finance, credit union, savings & loan, mortgage and oil company card accounts.

**Inquiries:** These are inquiries initiated by the consumer when the consumer is actively seeking to obtain credit. Inquiries made as a result of a mortgage loan are only counted as one when reported within a 30 day timeframe. Inquiries made as a result of an auto loan are also only counted as one when reported within a 30 day timeframe. Inquiries made by insurance companies are excluded. This does not include inquiries that are a result of a promotional credit solicitation, account review or account monitoring or when the consumer request his or her own credit report.

### Types of Credit Characteristics Analyzed

- **Payment History**
  - Has a bankruptcy been filed?
  - Are there any adverse public records?
  - Are there any collections?
  - Were payments made on time?
- **Financial Information**
  - Balances on accounts
  - High credit/credit limits on accounts
  - Degree of utilization (balance/credit limit)
- **Types of Credit**
  - Bank Revolving                      Primarily Visa, MasterCard, Discover type credit cards
  - Bank Installment                      Installment loans made by banks (fixed # of JC Penny, Sears, etc.)
  - Consumer Finance                      Sales finance such as large ticket items (furniture, stereos, TVs, etc.)
  - Personal Finance                      Primarily creditors that are a more expensive source to obtain credit such as Household Finance, Beneficial, etc.
  - Retail                                      Clothing stores (Limited, Victoria Secret, etc.), jewelers, home furnishings, mail order and variety stores
  - Automotive                              Tires, parts, service stations, new and used car lots, truck and farm equipment dealers
  - Auto Finance                              Finance or lease of a car primarily through a major car manufacturer such as GMAC, Ford Motor Credit, etc.
  - Credit Union                              Account established with a credit union. This category also includes savings and loan and mortgage company accounts
  - Oil Company                              Gas cards such as Shell, BP, etc.

- Age of Credit File
  - Age of oldest account
  - Age of youngest account
  - Average number of months since account opened
  
- Inquiry Activity
  - Number of consumer initiated inquiries in the last 6 months (excluding insurance company inquiries)
  - Number of consumer initiated inquiries with finance companies in the last 24 months
  - Number of months since most recent consumer initiated inquiry (excluding insurance company inquiries)

### **Extraordinary Life Events**

It is not systematically possible for the Attract models to identify items contained in a credit report that may be affected due to extraordinary life events such as catastrophic illness, loss of employment or divorce. Items identified as being in a dispute status will be excluded from scoring as required. Since the score cannot account for such circumstances, each carrier will need to develop standards and procedures for addressing same.

### **No Hits and No Scores**

There are some transactions where a score cannot be calculated either because a credit file could not be found (no-hit) or the credit information is too limited to produce a score (no-score). Attract will not calculate a score unless the credit file contains at least one consumer initiated inquiry or one account that has been reported to the credit bureau in the last 24 months. In addition a file that contains only consumer initiated inquiries will not be scored.

A study performed by the Bureau for Business Research indicates that no-hits and no-scores perform 7% worse than the average. Another study performed by EPIC Actuaries found similar results.

### **Score Reason Codes and Meanings**

In addition to generating the score value, the model also returns up to four “reason codes” which show the credit characteristics that had the most impact in reducing someone’s score. A list of these reason codes can be found following this section.

## Attract Homeowners

### Reason Codes and Corresponding Messages

Up to four reason codes are returned with each score. These reasons represent the most significant factors that contributed to the final score.

## Validation Procedures

The model development database was comprised of hundreds of thousands of policy records pooled from many insurers, including premium and claims data. Historical credit characteristics were matched to the policy records, and scores were developed to rank-order the loss ratio risk of policy groups.

The table below demonstrates the degree to which the Homeowner insurance score model was able to separate loss ratio performance on the development population:

<u>Score Group</u>	<u>Loss Ratio Relativity</u>
1	154
2	128
3	110
4	102
5	96
6	90
7	88
8	80
9	79
10	74

Note: A value of 100 in the table above represents the average loss ratio. Each score group represents ten percent of all policies.

All credit factors included in the algorithms had P-Values less than .05 indicating high individual statistical significance, and many factors had P-Values less than .0001.

The Attract Homeowner score was developed using credit data obtained through Equifax. The model was also validated on Experian data. The Attract scores are also validated on individual company data on an on going basis.

### **Legal Bulletins, 99-010 (05/05/99) COLORADO**

#### **Colorado Legal Bulletin**

#### **Legal Bulletin No. 99-010**

**May 3, 1999**

#### **EXECUTIVE SUMMARY**

The NAII has gathered additional cumulative data needed by companies to provide, as required under regulatory and statutory changes, actuarial justification to the Colorado Division of Insurance for treatment of customers with no prior insurance.

#### **Actuarial Justification For Treatment of Individual With No Prior Insurance**

Pursuant to Regulation 5-2-3 and Senate Bill 12, insurers are barred from refusing to write a policy for new applicants, surcharging premiums of new applicants, or placing new applicants in higher priced programs or plans solely because the applicant had no prior insurance, unless actuarial justification is filed with the Colorado Division of Insurance.

Supplementing the NAII "no priors" data call conducted last summer is loss ratio experience comparing policyholders with no prior insurance to those having previous coverage. This additional information was collected because the Division had some concerns regarding the loss cost data. That is, loss costs "do not address the main issue that the Division has had...specifically, the question of whether or not the data has been adjusted for age, territory, gender and other risk characteristics that are already accounted for in the rate classification structure." The loss ratios have been adjusted to reflect a uniform rate level, with premiums for the "no prior" group adjusted to reflect the "prior insurance" rate level.

Attached is a spreadsheet which includes 1996 and 1997 loss ratio experience, along with claim frequency, average loss and loss cost data. Note that the sample of companies participating in this "revised" call is somewhat smaller than the earlier sample; hence, frequency, severity and loss cost are different from what was provided to you in January. The results still show that individuals who had no prior insurance are worse risks than those having prior insurance.

**This correspondence serves as American Reliable Insurance Company's response to your objection letter referenced above.**

This will acknowledge receipt of the captioned filing.

### **Objection 1**

Comments: Pursuant to ACA 23-67-409, provide the 5 year premium/loss experience for Arkansas justifying the use of credit information in the development of the insurance score factors and file the model.

**Reply: We are using the Attract Homeowners model (see attachments)**

#### **5 Year Premium/Loss Experience**

Data	2007	2008	2009	2010	2011	2012	Grand Total
GPW	141,517	202,548	205,570	140,445	236,059	332,329	1,258,468
GPE	211,434	179,978	210,146	172,126	160,328	146,539	1,080,551
AY Loss Ratio	151.3%	240.3%	164.1%	42.8%	146.2%	104.9%	144.3%

**Since we have limited premium, we adopted American Modern Select's insurance score ranges.**

### **Objection 2**

Comments: Provide supporting documentation justifying the surcharge for lack of prior insurance.

**Reply: Please see attached exhibit Colorado No Prior publication.**

### **Objection 3**

Comments: Provide additional documentations supporting the significant base rate differential for Territory B.

**Reply: The territory rate differential is based on competitor analysis. Please see the attached AR ARIC MH competitor comparison.**

### **Objection 4**

Comments: The filing memo references a \$20 filing fee, while the manual pages show \$30. Please explain.

### **Objection 5**

**Reply: The filing memo was incorrect. The policy fee should state \$30. A revised filing memo is attached for your reference.**

Comments: For future filings, please do not submit manual pages in xls format. Only the HPCS may be submitted in xls format.

NOTICE regarding, corrections to filings and scrivener's Errors:

Effective for all filings made on or after June 1, 2011, Arkansas no longer allows the re-opening of closed filings for corrections, changes in effective dates, scrivener's errors, amendments or substantive changes. Please see the General Instructions for how these events will be handled after the effective date of the change.

In accordance with Regulation 23, Section 7.A., this filing may not be implemented until 20 days after the requested amendment(s) and/or information is received.

Comments: The premium/loss experience provided in response to ACA 23-67-409 is insufficient. The experience should be that relating to and justifying the credit scoring ranges, not overall premium/losses.

**Reply: Due to our current premium volume in AR, we do not have credible experience to provide. Instead we are providing our county-wide insurance score experience. Based on our country-wide data we used judgment to develop the scoring ranges and factors in this filing.**

Comments: Please explain the procedures and standards the company has developed for handling extraordinary life events/catastrophic illness as directed in the model summary.

**Reply:**

**Extraordinary Life Event – Insurance Score Information**

**An extraordinary life event includes any of the following kinds of events if that event has an adverse effect upon the first name insured’s credit-based insurance score:**

- 1. Catastrophic illness or injury**
- 2. Death of a spouse, child or parent**

**An event will not qualify as an extraordinary life event for rating purposes unless:**

- 1. The event precedes the date that we obtain the insurance score; and**
- 2. Reasonable written and independently verifiable documentation is provided by the first name insured; and**
- 3. This documentation provides evidence that the event adversely influenced the score.**

**In these cases we will grant the insured a “no hit” or neutral insurance score factor.**
