NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of UnitedHealthcare of Arkansas, Inc. (the Company) are presented on the basis of accounting practices prescribed or permitted by the Arkansas Insurance Department (the Department).

The state prescribes the use of the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) in effect for the accounting periods covered in the financial statement.

1-8. No significant differences exist between the practices prescribed or permitted by the State of Arkansas and those prescribed or permitted by the NAIC SAP which materially affect the statutory basis net income, capital and surplus, and total admitted assets, as illustrated in the table below (in thousands):

Statement of Statutory Accounting Principles (SSAP) No. 101, *Income Taxes – A Replacement of SSAP No. 10R and SSAP No. 10*, is effective for 2012 interim and annual financial statements and beyond. The new standard includes revised guidance for tax contingencies, non-elective deferred tax asset admissibility test along with significant modifications to the deferred tax assets admissibility test, and disclosure modifications. A change resulting from this adoption should be accounted for prospectively and reflected as a change in accounting principle in accordance with SSAP No. 3— *Accounting Changes and Corrections of Errors*. The adoption of this pronouncement does not have a material impact on the financial statements, including capital and surplus.

The Company's net deferred tax asset increased approximately \$183,000 from December 31, 2011 to March 31, 2012 primarily as a result of premiums received in advance. This change in net deferred income taxes had a corresponding impact on the current federal income tax provision.

Note 20 – Fair Value Measurement

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 — Quoted (unadjusted) prices for identical assets in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets
- Quoted prices for identical or similar assets in inactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.)
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.)
- Inputs that are derived principally from or corroborated by other observable market data

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and short-term investments (investments) are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. Based on the Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services, the Company has not historically adjusted the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

NOTES TO FINANCIAL STATEMENTS

The Company does not have any financial assets that are measured and reported at fair value on the statutory basis statements of admitted assets, liabilities, and capital and surplus at March 31, 2012 and December 31, 2011.

The Company does not have any financial assets with a fair value hierarchy of level 3.

The aggregate fair value by hierarchy of all financial instruments as of March 31, 2012 and December 31, 2011 is presented in the table below (in thousands):

There were no financial instruments that were not practicable to estimate at fair value.

Fair values of available-for-sale debt securities are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (pricing service), which generally uses quoted or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source, prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services has not historically resulted in adjustment in the prices obtained from the pricing service.

Note 24 - Retrospectively Rated Contracts & Contracts Subject to Redetermination

The Company has Medicare business which is subject to a retrospective rating feature related to Part D premiums. The Company has estimated accrued retrospective premiums related to Part D premiums based on guidelines determined by the Center for Medicare and Medicaid Services (CMS). The formula is tiered and based on medical loss ratio. The amount of Part D earned premiums subject to retrospective rating was \$670,000 and \$1,993,000 representing 6.0% and 5.5% of total net premium income as of March 31, 2012 and December 31, 2011, respectively.

Pursuant to the Health Reform Legislation, the Company is required to maintain specific minimum loss ratios. These minimum loss ratios apply to comprehensive major medical coverage and vary depending on group size. The liability for claims unpaid, accrued medical incentive pool and bonus amounts, aggregate health claim reserves and health care receivables as of December 31, 2011 were \$5,002,000. As of March 31, 2012, \$2,740,000 has been paid for incurred claims attributable to insured events of prior years. Reserves remaining for prior years are now \$477,000 as a result of re-estimation of unpaid claims. Therefore, there has been \$1,785,000 favorable prior-year development since December 31, 2011 to March 31, 2012. The primary drivers consist of favorable development as a result of ongoing analysis of loss development trends related to the release and reestablishment of \$528,000 in known environmental claims and \$1,202,000 in retroactivity for inpatient, outpatient, physician, and pharmacy claims. At December 31, 2011, the Company recorded \$1,209,000 of favorable development related to insured events of prior years primarily as a result of ongoing analysis of loss development trends and changes to the provider settlement reserves. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Included in this favorable (unfavorable) development is the impact related to retrospectively rated policies. As a result of the prior-year effects, on a regular basis, the Company adjusts revenue and the corresponding liability and/or receivable related to retrospectively rated policies and the impact of the change is included as a component of change in unearned premium reserves and reserve for rate credits in the statutory basis statements of operations.

The Company incurred claims adjustment expenses of approximately \$294,000 and \$1,050,000 for the three months ended March 31, 2012 and the year ended December 31, 2011, respectively. These costs are included in the management service fees paid by the Company to UHS as a part of its management agreement (see Note 10). The following table discloses paid CAE and incurred CAE for the three months ended March 31, 2012 and the year ended December 31, 2011, and the balance in the unpaid claim adjustment expenses reserve as of March 31, 2012 and December 31, 2011 (in thousands):
