NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Union Security Insurance Company (the "Company") are presented on the basis of accounting practices prescribed or permitted by the National Association of Insurance Commissioners and the Kansas Insurance Department ("KID").

The KID recognizes only statutory practices prescribed or permitted by the state of Kansas for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Kansas Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("SAP") has been adopted as a component of prescribed or permitted practices by the state of Kansas. There were no differences between the Company's financial statements prepared according to the NAIC SAP or practices prescribed by the state of Kansas which would require disclosure in the Notes to the Financial Statements. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Kansas is shown below:

	March 31, 2014	December 31, 2013
(1) Net Income Kansas state basis	\$ 18,905,004	\$ 85,356,135
(2) State Prescribed Practices (Income) - None	-	-
(3) State Permitted Practices (Income) - None	-	-
(4) Net Income, NAIC SAP	\$ 18,905,004	\$ 85,356,135
(5) Statutory Surplus Kansas basis	\$ 425,550,487	\$ 434,712,871
(6) State Prescribed Practices (Surplus) - None	-	-
(7) State Permitted Practices (Surplus) - None	-	-
(8) Statutory Surplus, NAIC SAP	\$ 425,550,487	\$ 434,712,871

2. Accounting Changes and Corrections of Errors

Accounting Changes

A. Effective January 1, 2014, the Company adopted revisions to SSAP No. 6, SSAP No. 35R, Risk Sharing Provisions of the Affordable Care Act, SSAP No. 47, SSAP No. 54, SSAP No. 61, SSAP No. 63, SSAP No. 66 and SSAP No. 84 to provide treatment provisions of the Affordable Care Act that take effect in 2014. The adoption of SSAP No. 35R increased required disclosures; refer to Note 21J. Effective during the first quarter of 2014, the Company recognized full expenses of the 2013 data year for the estimated fee payable in September and established special surplus for the estimated fee payable in 2015 to the federal government by health insurers under the Affordable Care Act. The Company has recognized assets, liabilities and income amounts associated with the implementation of the effective provisions of the Affordable Care Act on January 1, 2014.

B. Effective January 1, 2014, the Company adopted SSAP No. 26, Bonds, Excluding Loan-Backed and Structured Securities. The revisions clarify utilizing the "yield to worst" concept for make whole call provisions. The Company had previously been following the original intent of the revisions. There was no impact to the Company's financial statements.

3. Business Combinations and Goodwill

No significant change.

4. Discontinued Operations

No significant change.

5. Investments

D. Loan-Backed Securities

(1) Prepayment assumptions for loan-backed and structured securities were obtained from external sources and internal estimates.

(2) The Company has no other-than-temporary impairments of loan-backed and structured securities classified on the basis of intent to sell or inability or lack of intent to retain the security until recovery.

(3) The Company has no other-than-temporary impairments of loan-backed and structured securities in the current quarter on the basis the present value of cash flows expected to be collected is less than the amortized cost basis of the security.

(4) The duration of the Company's gross unrealized losses on loan-backed and structured securities at March 31, 2014 is as follows:

a. The aggregate amount of unrealized losses:			
	1. Less than 12 Months	\$	(54,466)
	2. 12 Months or Longer	\$	(19,253)
b. The aggregate related fair value of securities with unrealized losses:			
	1. Less than 12 Months	\$	7,699,609
	2. 12 Months or Longer	\$	721,576

(5) The Company regularly monitors its loan-backed and structured securities to ensure investments that may be other-than-temporarily impaired are identified in a timely fashion, properly valued, and charged against net income in the proper period. Assessment factors include, but are not limited to, the length of time and the extent to which the fair value has been less than amortized cost, the financial condition and rating of the issuer, whether any collateral is held, and the intent and ability of the Company to retain the investment for a period of time sufficient to allow for recovery. In performing the other-than-temporary impairment analysis the net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the security prior to impairment at the balance sheet date. Cash flow estimates vary based on assumptions regarding the underlying collateral including default rates, recoveries and changes in value.

NOTES TO FINANCIAL STATEMENTS

No significant change.

19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

No significant change.

20. Fair Value Measurements

A. Assets Measured at Fair Value

(1) Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company has categorized its financial assets into a three-level fair value hierarchy based on the priority of the inputs to the valuation technique.

The levels of the fair value hierarchy are described below:

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical financial instruments that the Company can access.

Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for the financial instrument, either directly or indirectly, for substantially the full term of the financial instrument. Level 2 inputs include quoted prices for similar financial instruments in active markets, quoted prices for identical or similar financial instruments in markets that are not active and inputs other than quoted prices that are observable in the marketplace for the financial instrument. The observable inputs are used in valuation models to calculate the fair value for the financial instrument.

NOTES TO FINANCIAL STATEMENTS

Level 3 inputs are unobservable but are significant to the fair value measurement for the financial instrument, and include situations where there is little, if any, market activity for the financial instrument. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the financial instrument.

The Company has determined that the CPI CAP is a financial asset classified as Level 3. The income valuation technique is used to price the CPI CAP. For the three month period ending on March 31, 2014, the fair value at the beginning of the period was \$2,016,327, with an unrealized loss of \$191,207; the fair value at the end of the period was \$1,825,120.

A non-pricing service source prices our CPI CAPs using a model with inputs including, but not limited to, the time to expiration, the notional amount, the strike price, the forward rate, implied volatility and the discount rate.

The Company's separate account assets and liabilities are measured and reported at fair value. The market valuation technique uses prices and other relevant information generated by market transactions involving identical or comparable assets. As of March 31, 2014, the fair values of the separate account assets and liabilities reported as Level 1 were \$1,642,303,062 and Level 2 were \$50,662,330.

The Company has no other material financial assets and liabilities measured and reported at fair value.

Valuation models used by the pricing service can change period to period, depending on the appropriate observable inputs that are available at the reporting date to price the assets. For the reporting periods presented, the application of the valuation technique applied to the Company's classes of assets measured at fair value has been consistent.

The Company generally obtains one price for each financial asset. The Company performs a monthly analysis to assess if the evaluated prices represent a reasonable estimate of their fair value. This process involves quantitative and qualitative analysis and is overseen by investment and accounting professionals. Examples of procedures performed include, but are not limited to, initial and on-going review of pricing service methodologies, review of the prices received from the pricing service, review of pricing statistics and trends, and comparison of prices for certain securities with two different appropriate price sources for reasonableness. Following this analysis, the Company generally uses the best estimate of fair value based upon all available inputs. On infrequent occasions, a non-pricing service source may be more familiar with the market activity for a particular security than the pricing service. In these cases the price used is taken from the non-pricing service source. The pricing service provides information to indicate which securities were priced using market observable inputs so that the Company can properly categorize our financial assets in the fair value hierarchy.

C. Aggregate Fair Value Disclosures and Level Within the Fair Value Hierarchy

The narrative and table below provide information regarding the fair value of financial instruments. Certain financial instruments are excluded, including those accounted for under the equity method of accounting, such as real estate joint ventures and affiliated common stock.

Refer to Note 20 (A) (1) above for disclosures on the methods and assumptions used to estimate fair value of the following items:

- Derivatives
- Separate account assets and liabilities

The following methods and assumptions were used by the Company in estimating the fair value of other financial instruments:

Bonds, preferred and common stocks

Fair values for bonds (including redeemable preferred stock) are based on quoted prices in active markets. For bonds not actively traded, fair values are estimated using values obtained from independent pricing services, model-based valuation techniques, or non-binding broker quotes. Inputs used include benchmark yields, issuer spreads, two-sided markets, benchmark securities, reference data including market research data, optionality, structure and liquidity. In the case of private placements, fair values are estimated by discounting the expected future cash flows using current market rates applicable to the coupon rate, credit quality, and maturity of the investments. The fair values for stocks are based on quoted prices in active markets; for stocks that are not actively traded, estimated fair values are based on values of issues of comparable yield and quality.

Mortgage loans

The fair values for mortgage loans are estimated using discounted cash flow models. The model inputs include mortgage amortization schedules and loan provisions, an internally developed credit spread based on the credit risk associated with the borrower and the U.S. Treasury spot curve. Mortgage loans with similar characteristics are aggregated for purposes of the calculations.

Contract loans

The reported carrying value for contract loans approximates their fair value.

Cash and short-term investments

The reported carrying value approximates fair value because of the short maturity of the instruments.

Other invested assets

The fair values of surplus debentures are based on market prices. The reported carrying value for low income housing tax credits approximates their fair value.

Securities lending reinvested collateral

The fair values for securities lending reinvested collateral are primarily based on matrix pricing models and quoted market prices.

Investment contracts

The fair values for the Company's liabilities under investment-type insurance contracts are determined using discounted cash flows analysis.

Deposit-type contracts

The carrying value reported for the Company's deposit-type contracts approximates fair value, and is primarily based on cash value payable to the policyholder.

Obligations under securities lending

The obligations under securities lending are reported at the amount of cash received from the selected broker/dealers.

NOTES TO FINANCIAL STATEMENTS

The following table summarizes the aggregate fair value of financial instruments and the level within the fair value hierarchy as of March 31, 2014:
