## **ADVANCED DRIVER TRAINING**

*For All State Agencies Participating In The  
Arkansas Multi-Agency Insurance Trust Fund*

The Risk Management Division offers a free AAA Driver Improvement Program for your agency's drivers. Employees completing this approved course are eligible for reduction in personally owned vehicle premium according to Ark. code Ann. 27-19-608.

Personal and job related vehicle collisions disrupt schedules and rob you and your employees of valuable work time. Injuries, deductibles, vehicle repair or replacement and administrative processing combine to drain productivity. It is in everyone's interest to do what can reasonably be done to reduce the frequency of vehicle collisions.

*Managing Visibility, Time and Space* has proven effective in reducing traffic fatalities and collisions. The program enhances driver safety, convenience, and comfort by using the most up to date research in a classroom setting. Personal involvement in class discussion is encouraged through the use of scenes depicting traffic situations and hazards.

Persons required to attend a Defensive Driving Class in accordance with the Arkansas State Vehicle Safety Program, Section V., can use the AAA Driver Improvement Program to satisfy that requirement.

For more information and to schedule a presentation, call the Risk Management Division at 501-371-2690. This is **free** presentation at your location. We provide all of the equipment and materials.
